

Radiate Bath Replacement Tray

Pumped shower tray

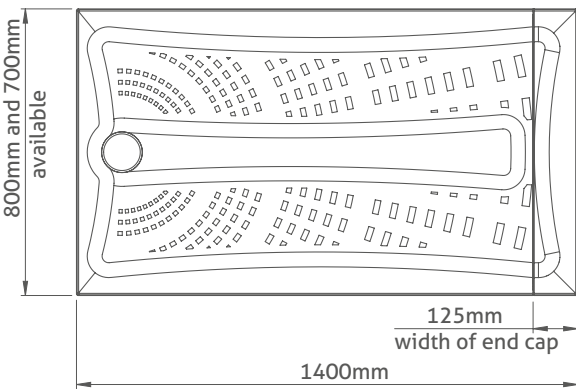

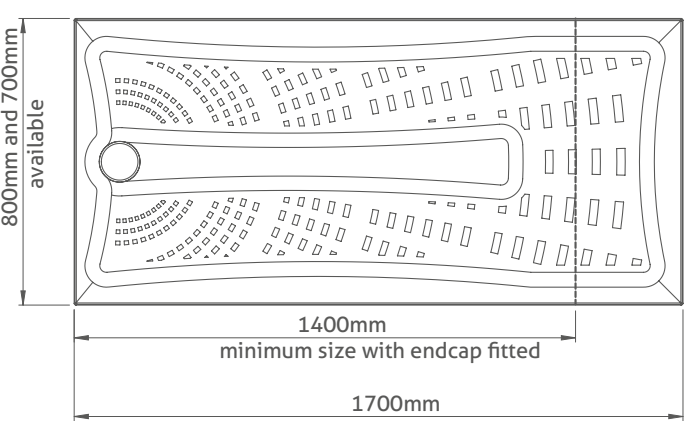

Radiate bath replacement trays offer an ideal solution when converting a bathroom from bath to shower without breaching the floor. Designed to fit standard bath footprints, our trays can be cut to length on site using a diamond cutting blade, with end caps supplied.

Optional access ramp kits and end caps are available to support safe and easy entry.

Trimable

Our 1700mm trays are trimmable to 1400mm, including 125mm end cap (comes with 1x end cap).

Code	Description
RDTEC70	1700 x 700mm
RDTEC80	1700 x 800mm

When measuring and cutting the tray please allow for the end cap.
DIN 51097:1992 Determination of anti-slip properties; wet loaded barefoot areas; walking method; ramp test.

Radiate Ultra Quiet Pumped Drain Technology

Designed to solve the challenge of unbreachable floors

Impey's Radiate tray features an innovative ultra-quiet pumped drainage system, enabling shower installation where traditional gravity drainage is not possible.

With all pipework contained within the depth of the tray, Radiate removes the need to excavate or recess into the floor structure, making it ideal for high-rise developments, refurbishment projects and challenging installation environments.

Compatible with Whale Switch Connect, Direct Connect and Instant Match waste pumps, Radiate provides a practical, high-performance answer without compromising on reliability.

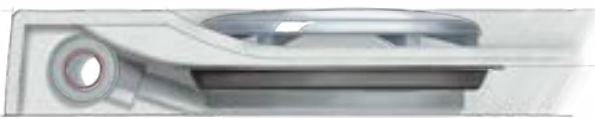

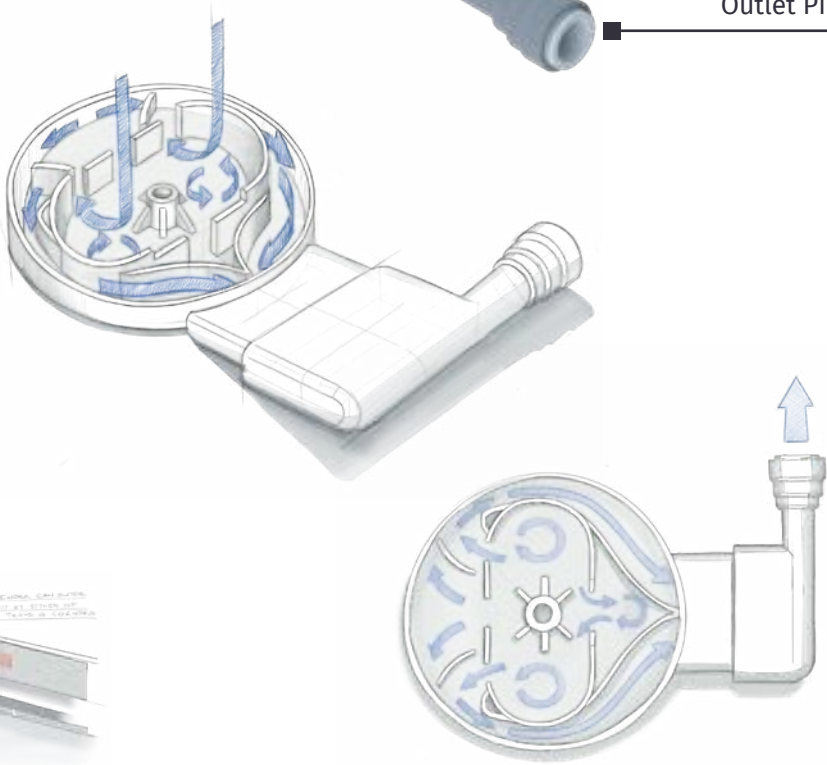

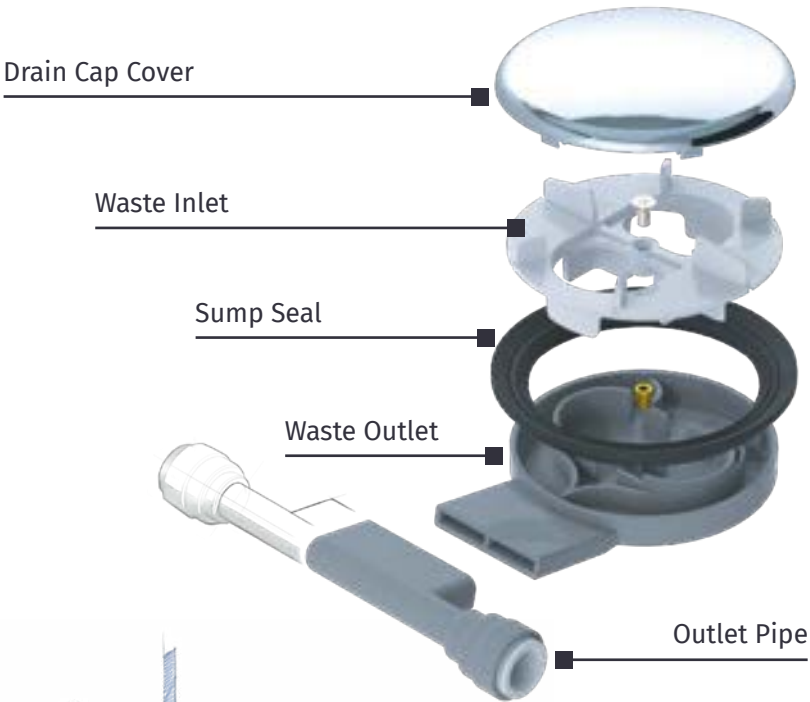

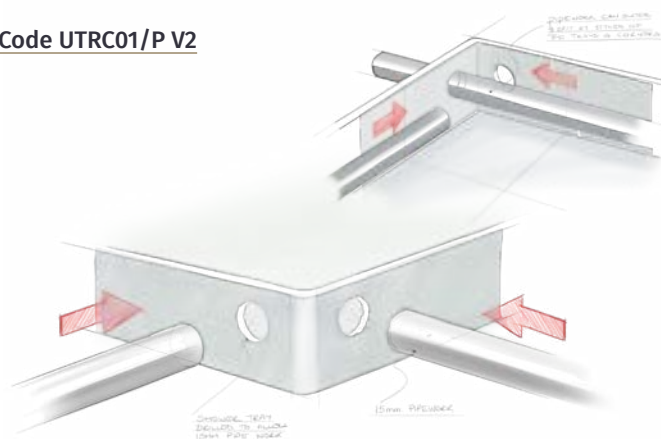

Advanced ultra-quiet performance

The Radiate tray has been engineered with a specially designed gradient and water channelling system that directs water efficiently towards the drainage outlet.

Water flows into a dedicated collection chamber before being guided through strategically positioned channels to the pumped outlet. The innovative low-profile outlet design helps minimise air intake, significantly reducing operating noise when compared with conventional pumped drainage systems.

The result is a quieter, more efficient drainage system that enables installation on floors where traditional drainage simply isn't an option.
